CASTLE INTERIORS

# “Camille”

The Camille collection is made of 100% solid pine, but certain pieces containing components that are susceptible to cracking and warping are made of 90% solid pine and 10% 0.3 mm thick oak veneer.

All pieces of furniture in this collection are made semi-mechanically. This means that their components are to a large extent made mechanically, but that they are finished by skilled furniture makers according to traditional methods.

- Each piece of furniture is sanded by hand.
- Each piece of furniture is scraped or brushed by hand (giving it depth, character and soul).
- Each piece of furniture is aged and antiqued by hand.

public price: € 28

Solid wood has the immense advantage of adding character to furniture. It has little knots, small cracks and slight color differences. In short, no two boards are identical. This makes solid wood furniture truly unique, gives it its elegant charm and adds visual interest.

Furniture maintenance:

The color of the Camille collection already provides good protection against stains, hand or fingerprints.

Extra protection can be provided by using Castle Interiors' hardwoodshield. This product is not a stain remover, but protects wood furniture against stains. However, even if your furniture is protected with the hardwoodshield, you should never allow a stain to set in. Always remove it immediately with a dry cloth.

As wood can contract and expand, the furniture pieces are made in such a way that they can grow or shrink a few millimetres in size. This might create small protruding edges at the sides of cabinets and/or tables.
